

Data Collection Report

Sampling Strategy

Participants were selected to ensure diversity by age range, profession, and geographic zone. Each group

Data Sources

- SMS export histories from MobileMoney and OrangeMoney.
- Questionnaire responses for demographic attributes.

Data Quality Controls

- Assigned anonymized user IDs to all participants.
- Removed personal identifiers before analysis.
- Checked for missing or inconsistent records during ingestion.

Challenges

- Some participants had incomplete SMS histories.
- SMS formats varied across providers; normalization was required.

Ethical Considerations

- Participation was voluntary with the right to withdraw.
- Data stored securely and used only for academic purposes.
